Step 1, Click the Start menu and type "system configuration" into the search box. Step 2, Select "System Configuration" from search results. Step 3, Click on the "Startup" tab, then remove checkmarks next to processes you don't want running after startup. This prevents applications you don't use from automatically running in the background after your computer starts up, leading to slowness and lagging.

Unless they are hiding in plain sight, the Aspire One 722 drivers from the official Acer download site are not available. Bad idea to use non-official sites. If Acer has "cleaned house" & removed the old drivers from their website, it's more efficient to use the Acer drivers shipped with the device than go on a wild goose chase for individual drivers.

One question though. I have an Acer Aspire One AOD 250 with the original 1GB of RAM installed. There are some conflicting reports on the Internet which state that although the Aspire can take the proper 2GB RAM card upgrade, the system cannot utilize the added memory, and users will not see a speed performance increase from the added memory.
