The variety of wood used for the back, sides and top of the guitar are highly significant and more particularly the combination of woods employed. The top and the back of the guitar must work well together and luthiers (guitar makers) are skilled at selecting complimentary combinations.

---

Classical Guitar Tone Woods Guide - London Guitar Studio

These days, many luthiers have started using woods like Pau Ferro and Cocobolo instead of rosewood, with good results. Ebony is a beautiful and very hard wood popular for fingerboards, though it is not seen as commonly because it is both rare and expensive. Ebony is especially popular on fretless guitars, where it is more durable than softer materials that are easily worn down by the strings.
