This is an updated version of the first arrangement. Because the electrical code as of the 2011 NEC update requires a neutral wire in most new switch boxes, a 3-wire cable runs between the light and switch. The red and black are used for hot and the white neutral wire at the switch box allows for powering a timer, remote control, or other programmable switch.

Speaker Outputs: The 500/1v2 amplifier's set-screw speaker terminals will accept 16 to 8 AWG speaker wire. Note: If your headunit does not have a dedicated remote turn-on output, the amplifier's turn-on lead can be connected to a +12V via a switch that drives power from an ignition-switched circuit.
