Business Math Word Problems Solutions

Math Word Problems and Solutions - Distance, Speed, Time. Problem 1 A salesman sold twice as much pears in the afternoon than in the morning. If he sold 360 kilograms of pears that day, how many kilograms did he sell in the morning and how many in the afternoon?

Math Word Problems and Solutions - Distance, Speed, Time

Price Slope = (change in Price)/(change in quantity) = (40 - 45)/(20 - 10) = -5/10 = -.5. y-intercept = 45 + .5(10) = 50. P is for price. Q is for quantity. Price equation: P = \$50 - \$0.50Q. Cost Slope = (change in cost)/(change in quantity) = (650 - 450)/(20 - 10) = 200/10 = 20. y-intercept = 450 - 20(10) = 250.

Business Math Word Problem | Wyzant Ask An Expert

Solution : Because both A and C are compared to B, let us assume the investment of B as "x". Given : A invested 125% as much money as B. Investment of A = 125% of x = 1.25x. Given : C invested 80% as much money as B. Investment of C = 180% of x = 0.8x. Given : The total of all the three is \$61,000. So, we have.

Partnership Problems with Solutions - onlinemath4all

Solving Problems Involving Cost, Revenue, Profit The cost function C(x)is the total cost of making x items. If the cost per item is fixed, it is equal to the cost per item (c) times the number of items produced (x), or C(x) = c x. The price function p(x) – also called the demand function – describes how price affects the number of items sold.

Solving Problems Involving Cost, Revenue, Profit

Selling price (S.P) = (100 + m)% C.P. Hint 2 : List price and marked down percentage are given. List price = L.P, Marked down percentage = m%. Then, Selling price (S.P) = (100 - m)% L.P. Hint 3 : List price price and marked down value (in dollars) are given. List price = L.P, Marked down value = \$m.

Read, explore, and solve over 1000 math word problems based on addition, subtraction, multiplication, division, fraction, decimal, ratio and more. These word problems help children hone their reading and analytical skills; understand the real-life application of math operations and other math topics. Print our exclusive colorful theme-based worksheets for a fun-filled teaching experience!

Math Word Problems Worksheets

To find the answer you need to work backwards, changing your math calculations as follows: Start with multiplying 351 by 8 $351 \times 8 = 2,808$ 2,808 is then divided by .90 $2,808 \div .90 = 3,120$ 3,120 is then divided by 52 $3,120 \div 52 = 60$ Test it out now $60 \times 52 = 3,120$ $3,120 \times .90 = 2,808$ $2,808 \div 8 = 351$ - It works out! Solution: Penny has 60 Barbie dolls
