The more we take into our body food closest to its original form, the more we can access nature's intelligence and turn it into the medicine we need for healthful living. According to Ayurveda, foods that are raw, fresh, locally sourced, and organic contain high amounts of prana, or vital life force, which animates all living beings. When you eat high pranic foods, you take in some of the natural healing intelligence of that food.

Berries, cruciferous vegetables, fatty fish, and mushrooms are just a selection of the foods that offer powerful medicinal properties.

**Food as Medicine: Does What You Eat Influence Your Health?**

Food As Medicine There are many reasons why we should pay attention to what we eat. The processed, low-variety foods many of us consume regularly may be convenient and tasty, but they compromise our health. We especially need to pay attention to what we eat when we are sick so we can give our bodies the nutrients it needs to heal.

This course introduces the concept of food as medicine. You will explore how food can be important both in preventative health and as an aid in the management of certain chronic diseases today, in the past and in the future. You will also learn about what's in food that gives it the potential to improve our health and how to recognise which types of foods are essential for health and wellbeing, and how food can play an important role in treating/preventing disease.
