[Book] Introduction To Genetics Section 9 2 Answer Key This introduction to genetics takes you through the basic components of genetics such as DNA, genes, chromosomes and genetic inheritance. Genetics is built around molecules called DNA. DNA molecules hold all the genetic information for an organism.

~~Introduction To Genetics Section 9 2 Answers~~

Online Library Introduction To Genetics

Section 9 2 Answer Key

Inheritance is the backbone of genetics and is an important topic to cover in an introduction to genetics. Long before DNA had been discovered and the word 'genetics' had been invented, people were studying the inheritance of traits from one generation to the next. Genetic inheritance occurs both in sexual reproduction and asexual reproduction. In sexual reproduction, two organisms contribute DNA to produce a new organism.
