Your Own Design

Complete plans to build a simple steam engine. These steam engine project plans were created by Bill Reichart. The Pip-Squeak was designed to be a very first, easy to build engine. It is built from bar stock. No castings are required. It can be made on a small hobby lathe and a small drill press. A small milling machine helps, but isn't necessary.

Vic Hill Racing Engines

This series of pages began as some thoughts in the October 2005 Issue of Model Engine News on what would constitute a good first choice engine design for a budding model engineer new to both engine building and model engineering. This page is an expansion of that material. We will examine the things known to cause difficulty and design features that present fewer problems.
