Anne Anastasi (December 19, 1908 - May 4, 2001) was an American psychologist best known for her pioneering development of psychometrics. Her generative work, *Psychological Testing*, remains a classic text in which she drew attention to the individual being tested and therefore to the responsibilities of the testers. She called for them to go beyond test scores, to search the assessed individual's history to help them to better understand their own results and themselves.
