16-2 Evolution as Genetic Change

Natural selection affects which individuals survive and reproduce and which do not. Evolution is any change over time in the relative frequencies of alleles in a population. Populations, not individual organisms, can evolve over time.

Section 16 2 Evolution As Genetic Change

16-2 Evolution as Genetic Change
Natural selection acts on individuals.
Evo-lution acts on populations.
Natural selec-tion acting on individuals leads to the evolution of populations. Natural selection on a trait controlled by a single gene with two alleles can cause one allele to increase and the other allele to decrease. Natural selection ...
