Notes Radar and TV Engineering RTV by Annapurna Mishra ...

A television system involves equipment located at the source of production, equipment located in the home of the viewer, and equipment used to convey the television signal from the producer to the viewer. The purpose of all of this equipment, as stated in the introduction to this article, is to extend the human senses of vision and hearing beyond their natural limits of physical distance.

Television - Principles of television systems | Britannica

The second aspect of performance to be met in a television system is the detailed structure of the image. A printed engraving may possess several million halftone dots per square foot of area. However, engraving reproductions are intended for minute inspection, and so the dot structure must not be apparent to the
