While holding the shift lock release like this, put the lever into the "neutral" position and then place the ignition in the "on" position in or to be able to unlock the steering wheels. Release...

What Does the "Shift Lock" Do? - autoevolution

Sounds like the shift lock solenoid is not working, there could be a couple of different things causing this. First thing I would check is the brake light switch witch is located under the dash on the brake pedal assy.. The second thing it could be is the shift lock solenoid its self, wich is located around or near the shifter. Posted on Nov 24 ...

Shift Lock Solenoid Failure. The shift lock solenoid is the mechanism that keeps you from shifting out of park without your foot on the brake. The good news is that most shift locks have an override button. You will need to find it for your particular model year of 4Runner (if applicable). Finding it is usually pretty easy. Just look at your shifter.
