Tuning and Temperament: A Historical Survey. The demands of tuning (attaining the perfect scale) and temperament (the compromises necessary for composing in every key) have challenged musicians from the earliest civilizations onward.

Tuning and Temperament: A Historical Survey

With the development of harmony and the increased use of chromatic notes, both tuning systems became increasingly unsatisfactory. Temperament. The first mention of temperament is found in 1496 in the treatise *Practica musica* by the Italian theorist Franchino Gafori, who stated that organists flatten fifths by a small, indefinite amount. This practice tends to spread out the mistuning of the fifth D–A over several fifths, so that all are tolerable although none is perfect.

paper will discuss

Tuning and Temperment

During the 19th century (for reasons we'll discuss later), keyboard tuning drifted closer and closer to equal temperament over the protest of many of the more sensitive musicians. Not until 1917 was a method devised for tuning exact equal temperament. So how was earlier European music tuned?

An Introduction to Historical Tunings

Tempering is an adjustment of the intervals between notes away from pure. It is a compromise to make the intervals fit. It is common to use the term 'tune' for both tuning and tempering. 'Tuning' is static and involves adjusting the pitch of one instrument to another, as when a group of instrumentalists 'tune up'.

History of Tuning and Temperament - Terry Blackburn

In musical tuning, a temperament is a tuning system that slightly compromises the pure intervals of just intonation to meet other requirements. Most modern Western musical instruments are tuned in the equal temperament system. Tempering is the process of altering the size of an interval by making it narrower or wider than pure. "Any plan that describes the adjustments to the sizes of some or all of the twelve fifth intervals in the circle of fifths so that they accommodate pure octaves and produ

Musical temperament - Wikipedia

The demands of tuning (attaining the perfect scale) and temperament (the compromises necessary for composing in every key) have challenged musicians from the earliest civilizations onward.

Tuning and Temperament: A Historical Survey by J. Murray ...

In the history of Western music's 12-note octave tradition, there have been several, fundamentally different forms of temperament applied to the developing keyboard. Music suffers when performed in a tuning that is different than that which the composer used in its creation.
