wisconsin 2 cylinder engine parts for sale | eBay

The two cylinder Wisconsin TJD and THD are both rugged, air cooled, cast iron workhorses used widely as sander engines on the back of snow plow trucks, to power irrigation pumps in cranberry bogs, in log splitters and many other industrial applications. Wisconsin Motors began producing air-cooled engines in 1929.

Tech Tip #201: Wisconsin Two Cylinder Cast Iron Engines ...

All Wisconsin's products were 4-cycle and they had power outputs from 2.4 to 65.9 horsepower (2 to 49 kW). There were single, inline two, V-two, and V-four cylinder models. The engines were designed for outdoor field service in industries including agriculture, construction, marine, oil-field equipment and railway maintenance..

Heavy Equipment Parts & Accs - Wisconsin Engine

Wisconsin engines are designed to meet the most rigorous demands placed upon them. They excel in severe duty, high torque applications and environments. The main product segments are tree grinders, concrete pumps, concrete saws, lifts and trenchers. Their engines can be configured to run on gasoline, natural gas, or propane fuels.

Wisconsin Motors Industrial Engines

Wisconsin engines should be re-timed at least twice per season or whenever the ignition spark appears weak. The instructions in this article are for TRA-10D and TR-10D models; the procedure may vary slightly for other motors. Step 1. Open the breaker box, which is usually located on the left side of the engine.
